

R80A-005C
Perforated Metal Guard

R80A-005B
Aluminum-polycarb
Enclosed Guard

DESCRIPTION

Two types of optional Supplemental Safety Guards are available for the RX-80 Webcutter Industrial Hot Knives.

P/N R80A-005C

The Perforated Metal Guard is a simple two-sided stainless steel guard with small holes to allow some visibility and ventilation of the work area. The opening at the bottom allows material up to 5/16" (8mm) thick to pass under the knife.

Requires drilling four small holes in the base plate. May be retrofitted to older models. Can also be supplied for most long-arm (RX-84) models.

P/N R80A-005B

This type is an aluminum framed enclosure with clear polycarbonate end and sides, and a perforated stainless steel top for ventilation.

Requires drilling and fitting to the base plate which becomes completely covered. For RX-80 models only.

Custom and special purpose guarding can also be supplied.

ABOUT THE WEBCUTTER

NOVA TECH is a manufacturer and direct supplier of The Webcutter - the leading industrial cut-to-length and hot knife cutting equipment. We offer many types of automatic and manual thermal cutting, sealing, and hole punching machines for webbing, nylon, rope, and other synthetic materials.
