

THE WEBCUTTER

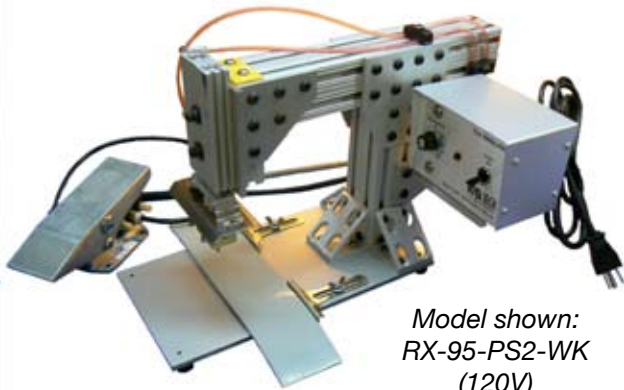

INTERNATIONAL POWER PLUGS

Model shown:
RX-80-BDL-WK
(120V)

Model shown:
RX-90-SBL-WK
(120V)

Model shown:
RX-95-PS2-WK
(120V)

GENERAL DESCRIPTION

The Webcutter product line is made up of the following configuration code:

RX-XX - XXX - XX - X

Controller Type _____
Power Plug _____

The RED digits denote the Controller type and Power Plug for any country. (The default Plug is type K - USA/ North America)

To configure The Webcutter for your country and mains voltage, select the Power Plug code from this list and insert that code in the Model Number.

THERMAL CONTROLLERS

The Webcutter hot knives and thermal machines incorporates several types of thermal controllers, depending on application:

W - Basic controller is inexpensive and provides a simple means of broadly regulating the operating temperature for tools that require up to 600W of power.

S - Heavy duty is used for operating loads up to 1200W.

D - Digital/PID controller is used when fine temperature control and/or higher heating load is required. This includes a type K thermocouple.

T - Timer incorporates an adjustable electronic cutting dwell timer which can be preset for various materials (for pneumatically operated models only).

POWER PLUGS

Plug Type A - Continental Europe, or "Schuko" plug; (230VAC 50Hz)

Plug Type C - Australia, New Zealand, Fiji, and Papua New Guinea; (230VAC 50Hz)

Manufactured in the USA by

PO Box 1357

Graham, NC 27253 USA
